

BERINO FARMERS SELL TURKEYS

Find Ready Market in El Paso; Showers Aid Grazing Land.

Berino, N. M., Jan. 19.—Several Berino farmers are disposing of their flocks of turkeys now in the El Paso market.

SHOTS FIRED THROUGH WINDOW WOUND MEXICAN

Firing two shots rapidly through a window, an unidentified Mexican slightly wounded Condemner Gutierrez, said to be a captain in the Carranza army. Tuesday night in a residence on East Ninth street, the bullet taking effect in the left knee. As the bullet was fired from the outside and went through the window, a thick curtain, it was nearly spent when it struck Gutierrez and inflicted only a slight flesh wound. After firing the shots the assailant fled.

SNOWSLIDE KILLS RAILROAD CAR; PASSENGERS BRUISED

Red Cliff, Colo., Jan. 19.—A snowslide which struck a westbound Denver and Rio Grande railroad passenger train near here shortly before midnight Tuesday night, killed the smoking car with snow and buried two passengers. The men, who were foreigners, were slightly cut by broken glass. The slide, it was said, consisted of light snow which fell yesterday and the train was only slightly delayed.

CHARGED WITH TRYING TO SELL GOVERNMENT PROPERTY

L. Lucas, of the 20th infantry, was arrested Wednesday morning at 10 o'clock on a charge of having a quantity of government property in his possession.

LANSINGS ARE HOST TO PRESIDENT AND BRIDE

Washington, D. C., Jan. 19.—Secretary of state and Mrs. Lansing entertained at dinner Tuesday night in honor of president and Mrs. Wilson. Those present included members of the cabinet, supreme court justices and other officials.

LOWLY LOUSE IS CAUSE OF TYPHUS

Silk Underwear Will Stop Lice; is Disease of the Barracks.

"It is the body louse and nothing but the body louse that makes typhus possible," said Dr. Carlos E. Husk, chief surgeon for the American Smelting & Refining company and now on the eve of entering Mexico to personally undertake relief work that would parallel in action and results the tremendous work of Dr. W. C. C. Strong, of Harvard university, who virtually stamped typhus out in the plague stricken soldier camps of Serbia.

What Is Typhus?

"What is typhus? Where did it originate? How does it differ from typhoid? What will it do to people who become infected with it?" The questions are old, said Dr. Husk. "They all parallel history. Turn over any of the records of war—especially where men have been confined in close quarters, where there has been little chance for fresh clothing, and less for the baths that make for personal cleanliness. Without an exception you will find that a disease of plague followed in the trail of all the confinement and misery and that plague was typhus."

In Old London.

"We know in a vague sort of way that London, the first city of Europe, was almost laid waste by an awful black plague and that during the medieval ages that it was no common thing to have vast areas swept clean of all human life. The blight was called the black plague and, presumably because the body became mottled, such as the mottling of the skin in snake and later almost solidly black when death set in."

Local Case Was Typhus.

"The man who died at the county hospital on Saturday died from a clear, text book case of typhus. His body became darkened. He had in a measure something that might have been called by simple people the black plague. Just what devastated Europe, India and China, epoch after epoch, may have been the bubonic plague, again may have been the typhus. But there is much reason to believe that it was typhus."

How did it get there?

"How did it get there? Where did it come from? I do not know. It is a something that is contemporaneous with dirt and filth and mankind has come up from dirt and filth, hence it is perhaps as old as the world."

Many Confuse Typhus with Typhoid.

"Many confuse typhus with typhoid. Do you know why? Because of the name and the name only. They might as well pick up a paper and see where a whole state of central Mexico is in the throes of the disease and the only

Sam Bean Building Is Torn Down to Be Replaced by New One.

Las Cruces, N. M., Jan. 19.—Evidence of Las Cruces' growth is shown in the building activity in the town. The Sam Bean building south of the Williams property on main street has been torn down and the debris is being hauled away, preparatory to the erection of a new business building.

Las Cruces Gets Rain.

A rain accompanied by some wind, visited Las Cruces last evening.

Thought as they put down that paper

"Well there is a lot of typhoid down in that country. They either have lots of mosquitoes, or a lot of infected water."

Not Typhoid Fever.

"But typhoid and typhus are different. Very different. The germ from typhoid comes from the bacillus coli communis found in the intestines. The germ from typhus is found in the blood. One is in the intestines and the other in the blood. The typhus germ occurs in small groups following no existing order of order."

High Fever.

"Now as to the effects and causes. Typhus is very rapid in its onset. It is symptomatic by violent head-

aches, more intense than in any other

disease that is heralded in the same manner. The temperature rises very rapidly and remains at 104 and they virtually eating up the body with its livid heat. The great degree of temperature usually occurs on the second and third day. The body becomes covered with mottled marks which, at one time, gave the disease the name of spotted fever. It has also been known as ship fever and barrack fever. In fact if only numbers and confinement associated with the fever, the kind of fever is apparent. It is always where men are banded together and in an environment.

No Typhus in North.

"I am living down in the central Mexico, with the permission of the authorities, to stamp out typhus and to perfect a serum that will be an effective in typhus inoculation as typhoid serum is in preventing typhoid. There is no typhus in northern Mexico that I know of and my impression is that it is prevalent alone in southern and central Mexico."

I have lived in Mexico on and off for

20 years, but my work at present is under the direction of the Mount Sinai hospital, of New York, and the expedition is financed by the Guggenheim interests and in behalf of the human race."

Lice Leaves Trail.

"Without any exception the unfortunate condition of the disease in Mexico today is due to the fact that winter has come upon them and that they have been living together in close quarters. The lice that are upon their bodies pass from one to another and the trail of the disease is as clear to the physician as the blood trail through the pines to the lumber jack."

In treating typhus the physician

has to show great care that he does not get the body louse, which transmits the germ, upon his person. In order to do this successfully he is advised to wear silk underwear, including socks, as lice are loath to crawl over or take quarters on a person wearing silk."

How to Prevent It.

"If there is danger of infection one should clear head and hairy parts of the body by using a solution of equal parts of kerosene and vinegar. Kerosene kills lice, vinegar kills nits. Wash up the affected area after rubbing thoroughly with this mixture for one hour only—longer use will scald. Wash off in 12 to 15 minutes with cold water. Repeat operations in 24 hours, to be sure that no lice have escaped the first treatment. Infected clothing or bedding should be boiled."

Dr. Husk has prepared a set of

special instructions to the mining and industrial of the American Smelting & Refining company. Among these instructions are suggestions as to a louse proof equipment for doctors. He admonished the superintendents to carry out extensive house-cleaning and cleanliness with the workmen, families and quarters."

Orders to Workmen.

"These orders are as follows: 'Be particularly careful of daily life. With clean living your chances of recovery, even though you contract the disease, are much greater. Keep physically above par. Get clean, keep clean, stay clean. Don't get lazy; it all depends on this.'

The serum we are using is

merely in the experimental stage. It offers all the added prophylaxis to the above that we are able to give up to the present. The injections will cause no discomfort. You can contract typhus even from the most virulent patients if they are louse free."

Serum from Mt. Sinai.

"The serum which is furnished by the Mt. Sinai hospital is packed in bottles containing sufficient vaccine for three persons. Each cubic centimeter contains 3 billion bacteria. The injections are made subcutaneously at five day intervals. The serum is made from a mild type of the disease epidemic in New York. It must be used within eight days on account of action in connection with antibodies."

"The treatment of the disease is purely symptomatic. The temperature should be reduced with cold sponging and baths. The circulation and excretory organs must be kept active. The symptoms can only be combated as they arise, Dr. Husk says."

SOCIETY DOINGS

(Continued from Previous Page.)

Petrich, "Our First Birthday Anniversary," and Mrs. S. J. Pennell, "Our Friends." The cutting of the birthday cake, which will close the party, will be in the charge of Miss Frances Foster.

The monthly meeting of the Women's

missionary society of the First Presbyterian church was held Tuesday afternoon in the parlors of the church. In the absence of the president, the vice president, Mrs. J. E. Townsend, presided. Mrs. A. W. Foster gave an interesting exposition of the fifth chapter of the study book "The King's Highway." Mrs. Walter Scott sang two Japanese songs. Mrs. O. A. Critchett played her piano accompaniment. Mrs. H. B. Durkee conducted the Bible study. The social hour which followed the meeting was in the charge of Mrs. T. W. Teague and Mrs. C. L. Overstreet as hostesses.

The Aid society of the First Congregational

church will meet Thursday afternoon at the home of Mrs. Miles Hanson, 1322 Laurel street, at 2:30 o'clock. It will be the work meeting of the society.

The Eastminster society of the West-

minster Presbyterian church will meet Thursday afternoon at 2:30 o'clock at the residence of Mrs. R. Randolph Jones, 2906 Nashville street.

Dinners, Luncheons, Teas.

Miss Valeria Garrard entertained Tuesday night with a jolly dinner at her home near the Country club in honor of Miss Bessie Taylor, daughter of Col. Charles W. Taylor, of the eighth cavalry. The table was decorated with red and white carnations and ferns. The guests were Misses Bessie Taylor, Virginia Bean, Mrs. Victor S. Foster, Col. and Mrs. Joseph Garrard, Lieut. Zila Drellinger, Lieut. Courtney H. Hodges, Ed. Heid and John W. Roberts. Following the dinner the guests attended the hop at Fort Bliss.

Mrs. E. W. Parker entertained with

an informal afternoon tea Tuesday afternoon at her home on Stewart street, complimentary to her grand-daughter, Miss Lina Parker, of Hollywood, Cal. The rooms were decorated with pink and white carnations and pink and white candles in silver sticks. The guests were received by Mrs. Parker and Miss Parker. The serving table was prettily arranged, laid with white lace doilies with a large basket in the center, tied with a big pink bow and filled with pink and white carnations. Above the table were silver candlesticks bearing pink and white candles. Assisting in serving were Misses Helen Murdoch, Mary Hardin, and Edna Headlin. Mrs. James H. Parker assisted in entertaining. Miss Winifred Woods played piano solo during the afternoon and Miss Odie Akin of Houston, Texas, sang with Miss Woods playing her accompaniment. About 40 of the younger school set attended the tea. Miss Parker will return to her home in California Saturday.

Mrs. S. V. Young entertained the

members of Circle One of the aid and missionary society of the First Methodist Episcopal church Tuesday afternoon at her home on Randolph street with a tea complimentary to Mrs. Herman G. Porter, who will leave soon for a visit to Florida. Mrs. Young and Mrs. Porter received the guests. Each luncheon was given a piece of cardboard which when fitted correctly together made the head of one of the prominent bishops of the church. After all were fitted together short talks were enjoyed through the afternoon. A concert of phonographic grand opera records were enjoyed through the afternoon. The serving table was attractive with pink carnations and ferns in the center, surrounded by pink candles in silver sticks. A lace cover was upon the table. Mrs. W. S. Groom, of Covington, Ky., poured tea. Those assisting in serving and entertaining were Mrs. F. Dille, Miss Mary Belle Keefe, and Miss Belle White. Among those present were: Mesdames Herman G. Porter, W. W. Pink, J. H. Herman, A. W. Gray, O. C. Bernard, V. S. Rogers, M. C. Yerkes, W. T. Snell, F. E. Schock, G. W. Dean, G. W. Alexander, Phyllis Tarbell, George Cowherd, G. B. Hettick, Mrs. Blouin, S. L. DeLoe, George M. Keefer, W. E. Orr, H. H. Briggs, A. Price, R. E. Wiley, W. S. Groom, E. F. Dille, Misses Mary Belle Keefe, Clara Flue, Eleanor Price and Belle White.

Mrs. C. E. Bryan delightfully

entertained the women of the Southern Methodist churches of the city Tuesday afternoon with a tea at her home on McKinley avenue in honor of the wives of the three southern Methodist ministers here, Mrs. W. F. Packard, Mrs. Hubert M. Smith and Mrs. Clyde K. Campbell, and the officers of the missionary society of Trinity Methodist church. The rooms were attractively decorated in a color plan of red and green. Ropes of greenery were twined about the columns and over the archways, with poinsettia blossoms among these, and about the rooms were red carnations and ferns in various sized vases. The guests were met at the door by Ruth Ruff and George C. Roberts, who received the cards. In the receiving line with Mrs. Bryan were Mesdames W. F. Packard, Hubert M. Smith, C. K. Campbell, I. J. Ayers, N. W. Winans, Dr. J. Cummins, D. M. Smith, J. L. Ely, B. L. Murphy, and D. Hurley. Refreshments were served from a prettily arranged table in the dining room. The table was covered with a drawn work cloth, with a central dolly embroidered with red carnations. The centerpiece was a vase of red carnations and ferns. Mrs. Alice Barlow and Mrs. J. A. Potter poured tea. Assisting in serving were a group of girls of the Philathes class of Trinity Methodist church, who were Mesdames Velma Casey, Hyrd Ferguson, Anna Ross Montague, Margaret Cunningham, Rena Shea and Cathryn Peake. Assisting in entertaining through the rooms were Mesdames Burleson Stetson, J. C. Ballard, Walter McDonald, W. T. Owen and A. E. Ahrends. During the afternoon a number of musical selections and readings were enjoyed. Mrs. Will T. Owen sang, with Mrs. Adine T. Owen playing her accompaniment. Miss Nell Beaman played piano selections. Mrs. C. O. Rucker and Miss Anita Cochran each gave readings. About 140 people called in the course of the afternoon.

Out Of Town Visitors.

Ray Stowe, of Portland, Ore., is in the city to attend the cattlemen's convention.

T. E. Thomas and his son, A. L.

Thomas, of Santa Rita, N. M., are in El Paso for a short business trip.

Otto Walters, of Berino, who has

been ill in an El Paso hospital, is reported to be much improved.

Mr. and Mrs. Peyton J. Edwards have

arrived in the city with a baby son, born January 15. Mr. and Mrs. Baumkirchner are spending a short time in El Paso from their mine in the Wauchoa mountains of Arizona.

El Pasoans Away.

Mrs. Nell Hale has gone to Tucson for a short business trip.

Mrs. David Sharp will leave today for

Los Angeles and other points in California for a visit.

SERVICE

Santa Fe

Fuel Company

For the Complexion

A new treatment that made a skin specialist famous

A great New York skin specialist has become famous because of his rice diet for the complexion.

The diet consists of rice boiled in water, white bread—both with plenty of butter—and water; nothing else for some days. The success of this treatment is due to the fact that it gives a sufficient amount of calories without nitrogenous elements.

Noted authorities refer to the effect this perfect food has on the system and, in turn, upon the temperament. Rice taxes the stomach least of all foods. Doctors always put dyspeptics on a rice diet. Nervous irritability is unknown where rice is eaten regularly.

Have you ever tasted the real rice flavor?

There are over 1400 varieties of rice. In flavor, in size and in quality there is a great difference. You cannot be sure of the rice you get unless you buy by name. Always ask for Comet Rice. Comet is carefully selected, large Head Rice, the very cream of the crop. Try Comet today—see how delicious rice can be!

Is Life Worth Living?

It Depends Upon the Liver.

Wrong living is the cause of most physical ills and generally stomach and liver are first to suffer.

Coffee drinking is a very common cause of digestive disorder, but it usually takes the user some time to fully realize it. Fact is—some people drink coffee with seeming impunity, but when disturbances of the digestive organs result in headache, biliousness, irritability and other common symptoms of caffeine poisoning it's time for the coffee drinker to look to his morning beverage for the true cause.

For any coffee drinker who finds that his health is wrong, but don't know just why, it's a good idea to quit the coffee and use

POSTUM

—the pure food-drink

Made of wheat and a small amount of molasses, Postum has a rich, snappy flavour much like that of mild Java coffee yet contains no caffeine (the drug in coffee) nor other harmful element.

There are two forms of Postum. The original Postum Cereal must be boiled; Instant Postum is soluble in boiling water and can be made in the cup at table. Both kinds are equally delicious and the cost per cup is about the same.

A change from coffee to Postum is a good move toward right living.

"There's a Reason"

Send a 2-cent stamp to Postum Cereal Co., Ltd., at Battle Creek, Mich., for a 5-cup sample of Instant Postum.
